

Introduction to TCCC Changes Summary

6 May 2021

Frank K. Butler Jr, MD

The most recent addition of the TCCC guidelines, dated 5 November 2020, contains a number of updates based on changes approved by the Committee on TCCC (CoTCCC) in the past several years.

There were seven separate changes considered and approved by the CoTCCC, addressing a variety of topics such as tranexamic acid, fluid resuscitation, prehospital analgesia, tourniquets, eviscerating abdominal injuries, and hypothermia prevention.

This article contains a brief summary of the highlights of these recent changes.

The updated TCCC Guidelines were published recently in the JSOM and can be downloaded from the Deployed Medicine website at: <https://books.allogy.com/web/tenant/8/books/b729b76a-1a34-4bf7-b76b-66bb2072b2a7/>

The newly developed Tier 3 TCCC curriculum, when released, will incorporate all of these changes.
